

The Bernard Osher Foundation started in 1977 with contributions to higher education and the arts. Within the field of higher education, the Foundation has focused on postsecondary scholarships, especially for older returning students; lifelong learning institutes for seasoned adults; and integrative medicine programs. The Barbro Osher Pro Suecia Foundation, founded in 1995, supports Swedish-American educational and cultural exchange. We have been committed for more than thirty years – and remain committed -- to directing the majority of our means to philanthropy.
